

Software Development Engineer- JD

Namma Yatri is a software as a service/ mobility as a service platform that enables drivers to connect to riders and undertake rides. Seamless services to drivers and frictionless user experience

2 lac rides /day | Live across 6 cities in India

What you'll be doing?

You'll be working on the core problems pertaining to our centers of excellence. Each of our Centres of Excellence balance the dual of Framework Development (The Ideal) and Business Enablement (The Practical)

1) Frontend Development:

- Crafting user-friendly UI/UX for seamless ride booking, using functional programming (FP) and ReactNative.
- Working on SDK integrations with other third party customer facing apps
- Building Multimodal, MultiTenant application which can be used across cities
- Ongoing enhancement of app performance.

2) Backend Engineering:

- Developing business logic for diverse ride-hailing services like Rentals, OneWay bookings, etc., primarily in FP.
- Working on reducing costs for Maps and third-party services.
- Researching and addressing mobility issues in smaller cities and developing frameworks for mobility.
- Enhancing developer productivity by contributing to NammaDSL (Domain Specific Language of NammaYatri)

3) Infrastructure Management:

- Ensuring a highly reliable infrastructure with 99.99% availability for global mobility services.
- Things like a Redis layer to minimize database load, thereby cutting costs and boosting scalability.
- Developing an Infrastructure DSL for efficient, large-scale management.
- Continuously optimizing infrastructure to manage growing traffic and reduce costs.

Apply if you are:

- *Passionate about programming and are curious about FP and have >1 years of development experience*
- *A seeker of depth and can see work as a means to achieve it.*
- *Do you look for aesthetics in your code?*
- *Someone who can stick to a project for long stretches of time either to solve a hard problem or to achieve a high bar of perfection (marathoner)*
- *An ambitious and constant learner who takes hard challenges*
